1. System Overview

The Utopia Deli Weekly Email Campaign is a 5-day automated email system that sends branded marketing emails to the customer database. It replaces ad-hoc messaging with a consistent, scheduled communication rhythm.

Campaign Schedule

DAY	SEND TIME	EMAIL TYPE	FOCUS
Monday	9:00 AM	"We're Open + Meal Prep Closes Wed"	Walk-up open 12:30-7:30 + meal prep urgency
Tuesday	9:00 AM	Catering Push	Events, parties, corporate
Wednesday	9:00 AM	"Last Call — Closes at Noon"	Final meal prep hours + we're open
Thursday	9:00 AM	"Pick Up Your Bowls"	Meal prep pickup + walk-up open + catering tease
Friday	9:00 AM	"New Week Fresh Bowls"	New meal prep week opens + weekend hours

Business Logic

- **Meal Prep Cycle:** Opens Thursday 8:00 PM → Closes Wednesday 12:00 PM → Pickup Thursday 12:30-7:30 PM
- **Walk-Up Hours:** Monday-Saturday 12:30 PM - 7:30 PM
- **Email Frequency:** 5 emails/week (reduced from 7 to avoid fatigue)
- **Segmentation:** None currently — blast to full list

2. Technical Architecture

```
n8n Schedule Trigger (Daily 9AM)
  → Set Day & Week (Code Node)
  → Route by Day (Switch Node)
    → Day-Specific Template (Code Node)
    → Postgres Contact Lookup
      → Filter Unsubscribed
        → SMTP Email Send (Gmail)
          → Log to message_logs
            → Done
```

Components

COMPONENT	TECHNOLOGY	PURPOSE
Scheduler	n8n Schedule Trigger	Daily 9:00 AM CST
Day Router	n8n Code Node	Determine which template to send
Templates	JavaScript (Function Node)	HTML email generation
Contact DB	PostgreSQL	Customer list with consent flags
Email Send	SMTP (Gmail)	Deliver emails with 20s throttle
Logging	PostgreSQL	Track sends, opens, bounces

3. Email Template Structure

All templates use the same base structure:

Header

- Deep burgundy background (#590B3F)
- Utopia Deli logo left-aligned
- “The Utopia Deli” text in Georgia serif

Body

- White background
- Hero image (day-specific)
- Headline in Georgia serif, burgundy (#590B3F)
- Body text in Georgia serif, dark gray (#1F2937)
- CTA button in rust red (#AF3D4B)

- Dish cards with images/descriptions
- “How It Works” info box (light gray background)

Footer

- Light gray background (#f8f6f4)
- Address: 801 S Chester St, Little Rock, AR 72202
- Unsubscribe link (tracks via webhook)

4. Contact Database

Table: `public.contacts`

COLUMN	TYPE	NOTES
id	integer	Primary key
square_id	varchar(255)	Square customer ID
name	varchar(255)	Customer name
email	varchar(255)	Email address
phone	varchar(50)	Phone number
consent_status	varchar(50)	‘implicit’ default
unsubscribed_email	boolean	false default
unsubscribed_sms	boolean	false default
last_order_date	timestamp	From Square sync
order_count	integer	From Square sync

Current Stats: - Total contacts: 356 - With email: 333 - With phone: 256 - With both: 233

5. SMTP Configuration

Provider: Gmail (theutopiadellittlerock@gmail.com) **Authentication:** App Password (stored in macOS Keychain) **Rate Limiting:** 20 seconds between sends (prevents “sent too many” errors)

Throttle Settings

SETTING	VALUE	RATIONALE
Delay between sends	20 seconds	Gmail SMTP rate limit
Max emails/hour	~180	3600s / 20s = 180/hour
Batch size	Full list	Sent sequentially with delay

Note: Previously used 10-second delay. Triggered “sent too many” error at ~250 sends. Increased to 20s resolved issue.

6. File Locations

Source Code

FILE	PURPOSE
email-campaign/utopia-deli-5day-campaign.js	Master template — paste into n8n Function node
email-campaign/utopia-deli-all-days.js	Legacy 7-day template (kept for reference)
email-campaign/utopia-deli-weekly-email-campaign.json	n8n workflow export (incomplete)

Images

FILE	DESCRIPTION
email-campaign/catering-1.jpg	Baked ziti/lasagna (catering)
email-campaign/catering-2.jpg	Glazed donuts (catering)
email-campaign/catering-3.jpg	Full catering spread
email-campaign/catering-4.jpg	Fresh fruit platter

Documentation

FILE	PURPOSE
email-campaign/PRODUCTION-NOTES.md	Weekly checklist, known issues
email-campaign/README.md	Campaign overview
memory/2026-06-23-utopia-deli-email-production-sent.md	Production deployment log

7. Weekly Update Process

Before Each Week

1. **Update bowl names/descriptions** in `utopia-deli-5day-campaign.js`
2. **Update images** if new photos available
3. **Test send** to internal email first
4. **Paste updated code** into n8n Function node
5. **Activate workflow** for the week

Monday Morning Checklist

- ☐ Verify meal prep closing time hasn't changed
- ☐ Check walk-up hours (holiday schedule?)

- ☐ Confirm email sent successfully
- ☐ Monitor unsubscribe rate

Wednesday Morning Checklist

- ☐ Verify meal prep actually closes at noon
 - ☐ Check pickup time for Thursday
 - ☐ Confirm email sent successfully
-

8. Troubleshooting

“Sent too many” Error

Symptom: SMTP node fails with “sent too many” after ~250 emails **Cause:** Gmail rate limiting **Fix:** Increase delay node from 10s to 20s between sends **Prevention:** Always use 20s+ delay for lists >200 contacts

Images Not Loading

Symptom: Email shows broken image icons **Cause:** GitHub raw URLs may change or images may be moved **Fix:** Verify image URLs in browser. Use `order.theutopiadelic.com` hosting for production.

Unsubscribe Not Working

Symptom: Unsubscribe link returns 404 **Cause:** Webhook URL may have changed **Fix:** Verify `https://n8n.systack.net/webhook/unsubscribe` is active

9. Production Notes

First Send: 2026-06-23

- **Test email:** Sent 10:28 CDT — SUCCESS
- **Production send:** Sent 10:30 CDT — SUCCESS
- **Recipients:** ~300 contacts
- **Issues:** SMTP throttling (fixed with 20s delay)
- **Result:** All emails delivered successfully

Known Issues

1. **Missing images for 3 bowls:** Street Corn Taco, Nashville Hot Lentil, Loaded BBQ Potato (using emoji placeholders)
2. **No segmentation:** All contacts get all emails
3. **No open/click tracking:** Basic SMTP only, no analytics
4. **Manual weekly updates:** Bowl names must be edited in code weekly

Future Improvements

- ☐ Build Google Sheets integration for easier weekly updates
- ☐ Add open/click tracking (SendGrid, Postmark, etc.)

- ☐ Segment by order frequency (regulars vs. lapsed)
 - ☐ Add A/B testing for subject lines
 - ☐ Automate image rotation based on availability
-
